

WORK PRIORITIES FOR 2024-2025

II LEVEL | DRONES AND MISSILE DEBRIS PROTECTION

46 elements

In total, major construction works were completed on **36 elements** (31 ATs, 1 GIS and 3 switchgear) at **20 substations** in **14 regions** of the country

In total, **27 autotransformers** were installed in protective structures at **19 SSS** in **13 regions**

In total, **18 autotransformers** were connected in protective structures at **14 SSS** in **11 regions**

COMPLETION DATE OF 38 ELEMENTS

December 2024 (3 additional elements in the current year)

III LEVEL | MISSILE PROTECTION

As of today, the average readiness of 22 protective structures in 14 regions is **25%**.

The level of readiness of the first priority protective structures (11 PS in 10 regions) varies **from 10% to 56%**.

PRIMARY BUDGET of 1 priority 11 priority substations **79,3** billion UAH

FINANCED of 1 priority **5,3**

REDUCED by optimising contracts **↓ 8,6**

REDUCED by optimising the project design **↓ 7,6**

CURRENT BUDGET reduced by 20% **57,8**

CONSTRUCTION OF SOCIAL HOUSING

PROJECT OBJECTIVE

Return of Ukrainians home

50 ths.

apartments

150 ths.

internally displaced persons (IDPs)

UAH 124 bn

PROJECT GEOGRAPHY

Lviv, Poltava, Ivano-Frankivsk, Khmelnytskyi, Uzhhorod, Ternopil, Vinnytsia, Cherkasy, Kropyvnytskyi, Brovary, Rivne, Lutsk, Bila Tserkva, Zhytomyr, Bucha

IMPLEMENTATION PERIOD

18 months

75%

State budget + funds from IFIs

25%

funds from local budgets

COST per 1 m² = UAH 41 285

TARGET GROUPS

- IDPs with limited income
- Critical infrastructure workers
- Military personnel without permanent housing
- People in need of support

LEGAL ASPECTS

- The apartments are not subject to privatisation and will remain social housing for at least 20 years
- The project envisages self-sufficiency through the rental of residential and non-residential premises

COST OPTIMISATION

- Use of local building materials, energy efficiency of buildings, reuse of projects

RECOVERY AGENCY

Chief fund manager, moderation and project development

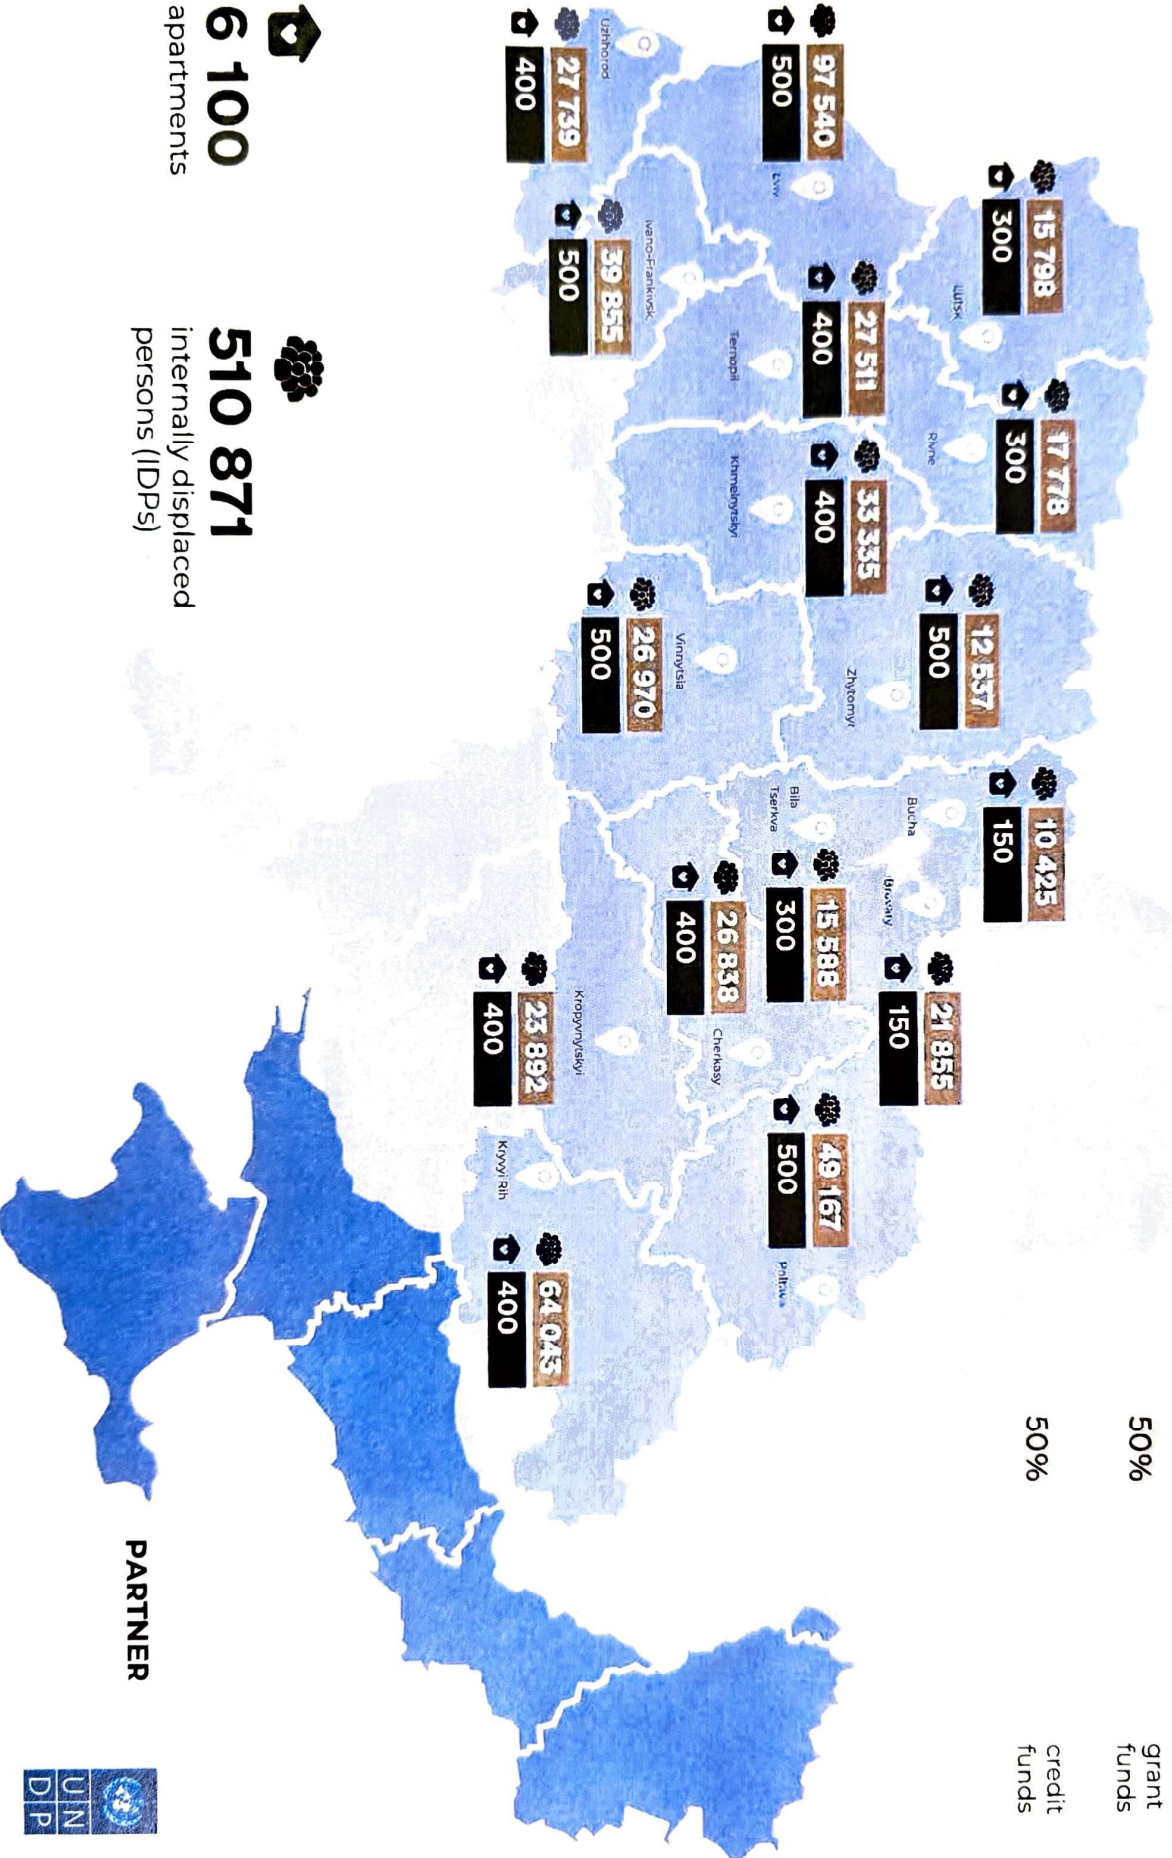

COMMUNITIES

Project implementer

CONSTRUCTION OF SOCIAL HOUSING. THE FIRST 6,200 APARTMENTS

EUR 400 million

50% grant funds
50% credit funds

apartments

510 871
internally displaced
persons (IDPs)

PARTNER

ENERGY EFFICIENCY MEASURES

PROJECT OBJECTIVE

Replacement of outdated street lighting in communities with more modern and energy-efficient lighting

2 mln

lamps with a dimming system

PROJECT PAYBACK

4 years

PROJECT GEOGRAPHY

All of Ukraine

IMPLEMENTATION PERIOD

2025 - 2026

EQUIPMENT COST

UAH 8 billion

FUNDING MECHANISM

- Grants for frontline communities
- Co-financing from partner funds, local budgets, loans

ECONOMIC EFFECT

582.5 cWatt

Electricity savings in 1 year

262 ths. tons

CO2 emission savings per year

SECURITY

Reduced accidents on the road

POTENTIAL PARTNERS

Ukrainian producers

OSRAM

PHILIPS

VARTA

RECOVERY AGENCY

Technical support, moderation, training

COMMUNITIES

CONSTRUCTION OF SOLAR POWER PLANTS FOR CRITICAL INFRASTRUCTURE

PROJECT OBJECTIVE

Uninterrupted operation of water utilities and other critical infrastructure facilities

400 mW

Capacity

PROJECT PAYBACK

up to 4 years

PROJECT GEOGRAPHY

All of Ukraine

IMPLEMENTATION PERIOD

2025

PROJECT BUDGET

UAH 10 billion

ECONOMIC EFFECT

ENERGY INDEPENDENCE
Reducing dependence on blackouts

SUSTAINABILITY
Increased reliability of critical infrastructure

DECENTRALISATION
Creation of autonomous energy sources

LOWER ENERGY COSTS

REDUCTION OF COSTS
for electricity with increasing tariffs

REDUCTION OF CO2 EMISSIONS

CONSTRUCTION OF A WATER SUPPLY SYSTEM IN MYKOLAIV

PROJECT OBJECTIVE

Water supply to 500+ thousand residents of Mykolaiv

65.2 km

Water supply in 2 pipelines with a diameter of 1000 mm

160 ths m3

Capacity per day

PROJECT GEOGRAPHY

Mykolaiv

IMPLEMENTATION PERIOD

November 2024 - August 2025

PROJECT BUDGET

Demand in 2024

UAH 5.2 billion

UAH 8.7 billion

Demand in 2025

UAH 3.5 billion

II stage

For the complete water supply system launch, additional work is required:

→ WATER PURIFICATION

UAH 6 billion

Reconstruction of sewage treatment facilities

a60

UAH 1.8 billion

SUEZ modular treatment structures

→ RECONSTRUCTION OF THE OKTYABRSKY RESERVOIR

UAH 5.9 billion

Also, it is planned to build solar power plants to ensure the operation of pumping stations (2 pcs.) and water intake (1 pc.)

TRANSFORMATION OF THE RECOVERY AGENCY AND SERVICES

PROJECT OBJECTIVE

Transforming into a transparent and effective accountable structure with a clear division of functions and control mechanisms

TRANSFORMATION OF THE AGENCY

- To establish an international advisory board of former ministers of transport, energy and national agency heads to help shape the strategic vision for major infrastructure projects
- To update the organisational structure
- To develop control mechanisms in line with the EU Pillars and international standards
- To update internal regulations and policies, and to comply with regulatory requirements
- To standardise the system of regular reporting

ESTABLISHING A CENTRAL PROCUREMENT ORGANISATION (CPO)

To establish a CPO in the structure of the Recovery Agency

To attract best experts on the market terms with engineering and procurement expertise and engage them in complex, high-cost and repetitive projects

STRENGTHENING THE PROJECT MANAGEMENT TEAM (PMT)

For effective and rapid implementation of recovery projects funded by IFIs
